

Table of Contents

Organizational Guidelines	1
Thank You Note	2
Chairman's Message	3
Timetable	4
Conference Programme	5
Opening session:	
Global status and outlook of renewable energy Rana Adib, REN21, Paris, France	12
Non-technical success factors for solar technology in developing countries Sebastian Götz, Fraunhofer Institute for Solar Energy Systems (ISE), Freiburg, Germany	13
Needs and market development for solar energy	
Commercialization of solar energy in urban and industrial areas (ComSolar) of India Timon Herzog, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), New Delhi, India	20
Establishing a solar thermal flagship district in Gauteng, South Africa Dieter Holm, SOLTRAIN/SESSA, Hartbeespoort, South Africa	26
The emergence of the local solar industry in Morocco Benoît Payard, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), Accompagnement du Plan Solaire Marocain, Rabat, Morocco	32
Role of an association and training in the development of a solar thermal market in Thailand Christoph Menke, University of Applied Science Trier, Germany, Joint Graduate School of Energy and Environment, Bangkok, Thailand,	38
Financing for solar energy in developing countries	
Financing for solar energy in developing countries Silvia Kreibiehl, Frankfurt School of Finance, Frankfurt, Germany	46

**Challenges and obstacles for solar energy project developers
in emerging markets** 47
Boris Westphal, Suntrace GmbH, Hamburg, Germany

**develoPPP.de - Development partnerships with the private sector
– solar energy** 53

**Financial support for companies investing in developing and emerging
countries by the German Federal Ministry for Economic Cooperation
and Development (BMZ)**
Annika Powitz, GIZ, Eschborn, Germany

Poster session

**A 1 Simulation of thermosyphon systems for solar domestic hot
water preparation** 56
Marie Hüneke, Technische Hochschule Ingolstadt, Germany

A 2 Proposal of a cluster on solar thermal systems in Mozambique 62
Geraldo Nhumaio, Universidade Eduardo Mondlane, Maputo,
Mozambique

**A 3 Efficiency and economic comparison between two CPVT
systems in Cairo** 67
Tarek Khalil, German University in Cairo, New Cairo City, Egypt

**A 4 Simulation of a solar assisted air conditioning system for a
building in the German University in Cairo** 71
Tarek Khalil, German University in Cairo, New Cairo City, Egypt

**A 5 Sustainable electrical energy supply model for agricultural
activities and rural populations in west african countries** 73
Konate Salia, University of Applied Sciences Technikum Wien,
Mödling, Austria

A 6 The BlogaST project - biogas support for Tanzania 78
Jana Möllenkamp, institut für Solartechnik SPF, Rapperswil,
Switzerland

B 1 From 'solar energy Zimbabwe' to SOLTRAIN 84
Anton Schwarzlmüller, Domestic Solar Heating P/L,
Harare, Zimbabwe

**B 2 Monitoring results of installed solar thermal systems in the
Southern African Region** 90
Rudolf Moschik, AEE-INTEC, Gleisdorf, Austria

B 3	Potential of distributed grid-connected solar photovoltaic systems in rural electrification in Africa: Case study of Walewale, Ghana Emmanuel Narteh Narh, AU Grid-Solar Project The Energy Center, Kumasi, Ghana	95
C 1	Effectiveness of last mile entrepreneurs (LMEs) in sustainable supply of clean energy technologies in rural areas "A case of energising development Kenya Country Programme (EnDev-Kenya) – solar component" Walter Kipruto, GIZ, Nairobi, Kenya	101
C 2	Barriers for successful implementation of solar-energy based development cooperation in developing countries Chian-Woei Shyu, National Chung-Cheng University, Min-Hsiung, Chia-Yi, Taiwan	107
C 4	Social, political and economic barriers for a successful solar project implementation in Rwanda Francois Nezerwa, DASSY Enterprise Ltd, Kigali, Rwanda	113
C 5	The ISES Webinar Program: Online training and information to overcome knowledge barriers for implementing solar energy technology in developing countries Elimar Frank, ISES, Freiburg, Germany	119

Photovoltaics in development cooperation – moving from off-grid rural applications to large scale deployment

Technological overview on sustainable PV off-grid rural electrification technologies	126
Michael Müller, Steca Elektronik GmbH, Memmingen, Germany	
Photovoltaic milk cooling as business opportunity in the tropics	132
Victor Torres Toledo, Universität Hohenheim, Stuttgart, Germany	
PV in the ASEAN Region – Challenges for large scale deployment in prospective markets	138
Arne Schweinfurth, Renewable Energy Programme Indonesia/ASEAN, GIZ, Indonesia	
Mini-hydro and PV village power systems transferred to the Afghan national utility DABS for sustainable operation and maintenance	140
Winfried Klinghammer, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH, Faizabad, Afghanistan	

Solar beats Diesel – Best practice example solar smart grid Tabarre, Haiti 145
Willi Ernst, BIOHAUS-Stiftung für Umwelt und Gerechtigkeit, Paderborn, Germany

Solar thermal: Drying, air heating, process heat

Overview on solar thermal technology 152
Bernd Hafner, Sonnenenergie für Westafrika e.V., Germany

Innovative Inflatable solar dryer for tropical countries 158
Ana Salvatierra Rojas, Universität Hohenheim, Stuttgart, Germany

Green and sustainable solar thermal project: a successful case study of Industrial scale solar dryer in PPP model of Nepal 163
Ram Prasad Dhital, Institute of Engineering, Tribhuvan University, Nepal

Solar thermal solutions for increasing energy demands in a sub-zero temperature climate in Ladakh, India 169
Joachim Götsche, FH Aachen Solar-Institut Jülich, Jülich, Germany

First solar process steam system in Jordan 175
Martin Haagen, Industrial Solar GmbH, Freiburg, Germany

Solar thermal: Heating and cooling, domestic hot water

Solar heating and cooling in developing countries: Experiences and potentials 182
Christian Holter, S.O.L.I.D., Graz, Austria

Solar water heating vision for Namibia 188
Helvi Iлека, Polytechnic of Namibia, Windhoek, Namibia

The SOLambara project – profitable substitution of electrical water heaters by solar thermal systems at university dorms in the Usambara Mountains, Tanzania 192
Elimar Frank, Institute for Solar Technology SPF, Rapperswil, Switzerland

Solar energy mobile training units (SOEMTU) and National Energy Policy of Zimbabwe 198
Samson Mhlanga, National University of Science and Technology, Bulawayo, Zimbabwe

Solar energy for decentralised water treatment systems

Photovoltaic driven reverse osmosis - Chance for sustainable water production in development cooperation? 206
Joachim Went, Fraunhofer Institute for Solar Energy Systems ISE, Freiburg im Breisgau, Germany

Solar-driven water treatment – practical experiences and lessons learned of realized projects in India 212
Marcel Wieghaus, SolarSpring GmbH, Freiburg, Germany

Solar driven drinking water supply using Anodic Oxidation as energetically efficient disinfection alternative 218
Alexander Goldmaier, AUTARCON GmbH, Kassel, Germany

Capacity Building

Enabling PV in the MENA region – The emerging PV markets in Tunisia and Jordan 226
Anita Richter, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ), Berlin, Germany

NEED: Network of excellence in renewable energy technologies for development 232
Wilfried Zörner, Technische Hochschule Ingolstadt, Ingolstadt, Germany

Business opportunities with solar systems - From the solar mill to the solar market place 238
Géraldine Quelle, Phaesun GmbH, Memmingen, Germany

20 Years of solar energy education, research and commercialization in Lesotho 1993 - 2014 244
Ivan Yaholnitsky, Bethel Business and Community Development Centre, Mt. Moorosi, Lesotho
